Barbara Thurman, A.P., CCT
Florida Licensed Nationally Certified
Acupuncture Physician
Certified Clinical Thermographer

Patient Information

Breast Screening with Digital Infrared Thermal Imaging (Thermography)

Purpose of test:

For early detection of abnormal changes in the breasts.

Patient preparation:

Do not smoke for 2 hours before the test, do not use lotions or powder on your breasts on the day of test, avoid sun exposure on day of test. Do not wear deodorant/antiperspirant. Do not have massage, physical therapy, or exercise sessions before the test.

Diet - Do not have caffeine 2 hours before the test.

Medicines - Beta blockers and anti-inflammatory medications may affect the test. Avoid using these the day of the test.

Disrobing - Remove all upper body clothing and jewelry. Put on surgical gown supplied.

Inform your Thermographer if you have had any recent skin lesions on your breasts; the inflammation can cause a false positive result.

How the test will feel:

The room air may feel cool on your breasts as you adjust to room temperature before scanning. Examining rooms are frequently quite cool when you disrobe for the examination. The procedure is totally non-invasive, the camera does not emit radiation of any kind.

Time before test results available:

Time before results are reported to the doctor or patient varies from a few minutes to a few days.

Frequently asked questions:

Where is test performed?

Thermography clinical laboratory at 921 E. Ocean Blvd. #2.

Who performs test?

A Certified Clinical Thermographer.

Any risks or side effects?

None. Procedure is totally non-invasive.

How long does it take ?

Patient time for test: 15 minutes plus 15 minutes to disrobe and cool.

Cost of test?

\$185.00, which includes testing, reports, and digital images. (Extra sets of images are available for an additional charge if needed.)

You are welcome to bring a companion or partner to be present at the examination

Participation in a DITI early detection program can increase your chance of detecting and monitoring breast disease, as with all other tests, it is still not a 100% guarantee of detection.

Please be on time for your appointment and bring your completed paperwork with you.
